T-shirt design

OVERVIEW

I specialize in utilizing the latest front-end web frameworks to organize and communicate information. My background in the humanities, design, and programming allows me to bridge the divide between disciplines to effectively translate user needs and achieve desired business goals.

EXPERIENCE

QA Automation Developer — June 2020 - Present
Collabera at BASF, Remote

Ensure new and existing app features function correctly and perform at industry standards.

- Document and report app problems and concerns
- Write automated tests based on the Cypress framework
- Contribute users stories to resolve issues or improve application usability
- Utilize Azure DevOps for issue and project tracking

Cloud App Development Trainee — Sept. 2019 - May 2020
Collabera at BASF, Whitehouse, OH and Remote

Programmed features for a soon-to-launch cloud-based paint formulation and mixing application.

- Utilized TypeScript, Angular framework, HTML5, and SASS to develop dynamic and user-friendly front-end interfaces
- Programmed backend functionality in C# .Net and SQL
- Used Git for version control and JIRA for issue tracking

Freelance Web Developer — Jan. 2017 - Aug. 2019
Self-Employed

Ensure new and existing app features function correctly and perform at industry standards.

- Built websites for businesses that reflected brand image and supported business goals
- Troubleshot, updated, and added features to client websites
- Built and maintained e-commerce sites based on Woocommerce

Customer Success Specialist — March 2014 - Jan. 2017
Collage.com, Remote

Provided an exceptional online customer experience to customers designing photo products.

- Resolved issues for a high volume of customers via chat, email, and phone
- Completed special projects for product usability and customer feedback surveys
- Wrote and updated website documentation for customers and staff
- Worked with development team to resolve website technical issues
